Contact: Dr. Richard J. Chappell, Commercial Manager EMEA

Mob: +44 (0)7954 203003

Email: richard.chappell@collagensolutions.com

Web: www.collagensolutions.com

Collagen Solutions plc is a global provider of medical grade collagen formulations and components for use in regenerative medicine, medical devices and diagnostics.

We provide native, soluble and powdered collagen formulations and expertise in the development and contract manufacture of collagen components for use as tissue scaffolds and medical devices.

Green Cross Medico Ltd

10 Candymill Lane
Bothwell Bridge Business Park
Hamilton, ML3 0FD
Scotland, UK

Contact: Sheena Jack, Marketing & Design Director

Tel: +44 (0)330 120 0402

Email: info@greencrossmedico.com

Web: www.greencrossmedico.com

Twitter: [@greencrosmedico](https://twitter.com/greencrosmedico)

We are a medical innovations company designing and developing medical products by improving and existing technology or new development to serve the needs that have been clearly defined and acknowledged by medical professionals. We have been working with NHS Innovations South East and recently NHS Innovations West Midlands.

We have developed a unique product called Airglove in conjunction with The Maidstone and Tunbridge Well NHS Trust which has just completed their initial patient evaluation. Airglove is a patient warming system to enable access to the veins in patients' arms for the delivery of intravenous drugs such as chemotherapy. This product has been developed as there is a gap in the market with no product to solve the issue of hidden and fragile veins.

i4 Product Design Ltd

Suite 3, Broomhills Business Centre
49 Frogston Road East
Edinburgh, EH17 8RT
Scotland, UK

Contact: Tristan Elliott, Business Development Manager

Tel: +44 (0)131 448 2266

Email: telliott@i4pd.co.uk

Web: www.i4pd.co.uk

Twitter: [@i4productdesign](https://twitter.com/i4productdesign)

i4's team of experienced industrial designers, product designers and engineers work with their medical device customers to create new products and improve the competitiveness of existing products.

The ISO 13485 certified company was established in 2003 and prides itself on delivering beautiful designs that are beautifully engineered. The company differentiates itself from other design agencies through a holistic approach to design that ensures iconic aesthetics and manufacturability are both considered from the very start of any project. The firm can support the design and development of rapid prototypes through to full-scale production.

Web: www.lorit-consultancy.com
Twitter: @LoritConsult

Lorit Consultancy provides functional safety and regulatory compliance consultancy and training to organisations in the medical, automotive and aviation industries. With many years of experience in developing hardware and embedded software and a real understanding of the demands placed upon development teams, coupled with an in-depth knowledge of regulatory standards, we are the ideal partner to support companies in ensuring their projects meet all safety and regulatory requirements.

From the concept phase through to start of production, we assist with the complex exercise of international standards compliance.

MOFgen Ltd
Purdie Building
North Haugh, St Andrews
Fife, KY16 9ST
Scotland, UK

Contact: Dr Yvonne Davies, CEO
Tel: +44 (0)1334 463828
Email: yvonne.davies@mofgen.com
Web: www.mofgen.com
Linkedin: www.linkedin.com/company-beta/17917715

MOFgen Ltd, a spin out from University of St Andrews, is developing a pioneering cutting-edge technology for coating medical devices that will reduce Healthcare Acquired Infections (HAIs), prevent procedural complications and improve healing rates.

We have patented technology for the use of Nitric Oxide gas in MOFs and our target markets are production of Metal Organic Coatings for use in medical devices such as wound care products, catheters and technical textiles.

Ross Wark Medical Ltd
81 John Player Building
Stirling, FK7 7RP
Scotland, UK

Contact: George Miller, Director
Tel: +44 (0)1786 478383
Mob: +44 (0)7952 393675
Email: info@rosswark.com
Web: www.rosswark.com

An orthopaedic surgeon, David Ross, realised that the plaster saw used to remove fracture casts frightened patients, particularly young children.

The saw caused noise, dust, vibration and the risk of burning the patient's skin with the saw blade which became hot with use. He and George Miller, a chartered engineer and MBA Graduate, formed Ross Wark Medical Ltd to develop a safer device for the removal of synthetic casts.

Now on the market, Casterpillar™ cast cutter, is not a saw and is safe, quiet, and has been well received by patients and clinicians.

Squat Easy

12 Southview Road
Strathblane
Glasgow, G63 9JQ
Scotland, UK

Contact: Graeme Smith, CEO
Mob: +44 (0)7540 706378
Email: gsmith@squateasy.com
Web: www.squateasy.com
Twitter: @squateasy

Bowel Health - a step in the right direction.

Squat Easy is a very simple and easy way to get into the correct toilet posture position. It is half the size of a typical toilet stool and so much more suited for a modern bathroom. It is super strong and suitable for all toilets. Very importantly, it has been designed with anti-bacterial elements built into it – making the Squat Easy the world's first anti-bacterial stool with patent pending. Some of the world's leading Gastrointestinal specialists have helped make Squat Easy the simple - yet very effective - product it is. Dr Chris Steele (GMTV Doctor) says "I believe every bathroom should have a Squat Easy."

wheelAIR

Henderson Loggie
Gordon Chambers
90 Mitchell Street, G51 2UW
Scotland, UK

Contact: Corien Staels, Director
Mob: +44 (0)7983 292819
Email: corien@staelsdesign.com
Web: www.wheelair.co.uk

Staels Design Ltd. is a Glasgow based start-up formed to meet unmet needs in rehabilitation product design and mobility equipment. With their first product wheelAIR, they created a battery powered airflow backrest cushion designed to cool down the user while increasing comfort, never compromising on style.

The product was designed with the input of Paralympic athletes and wheelchair producers and its results have far exceeded expectations. Not only does wheelAIR cool the back, users have seen a drop in core temperature which allows for more comfort and a reduced risk of hyperthermia. wheelAIR allows you to Be cool, and Stay cool.

Developing next generation Proton Beam Therapy systems, using “Linear Acceleration” providing higher beam quality at much lower price. Generating little prompt and inducing radiation, reducing shielding. End of lifetime machines can be easily and safely disposed of. Reducing complexity, treatment time, and system’s cost, makes proton therapy viable for all.

Aseptium Limited
Aurora House
8 Inverness Campus
Inverness, IV2 5NA
Scotland, UK

Contact: Pawel de Sternberg Stojalowski, Managing Director
Mob: +44 (0)7853 200379
Email: info@aseptium.com
Web: www.aseptium.com
Linkedin: www.linkedin.com/in/pstojalowski

Aseptium specialises in technologies for decontamination of complex surgical instruments. We make advanced washers dedicated to the most difficult to clean medical equipment like robotic, ophthalmic, micro and neurosurgical as well as orthopaedic instruments.

We also provide equipment for evaluation of cleaning effectiveness. Our unique multistage processes utilise non-recirculation technology (global patent pending) that, beyond effective cleaning, allow to integrate most manual pre-cleaning processes (like soaking or chemical flushing) into one automated washing cycle; this solution improves instrument handling, process efficiency and consistency – saving you time and money.

Cytosystems

Cytosystems Ltd
Cruickshank Building

Scotland, UK

Contact: Nigel McLean, Director of Product Management
& Commercialisation

Tel: +44 (0)1224 711375

Email: nigel.mclean@cytosystems.com

Web: www.cytosystems.com

Cytosystems is pioneering the development of non-invasive cancer diagnostics. Through private funding plus the second largest life-science EU Horizon2020 grant in the UK Cytosystems has developed BladderLight™, a semi-automated digital pathology test for diagnosis and monitoring of bladder cancer.

BladderLight™ adopts both clinically verified urinary biomarkers (→90% sensitivity and specificity in a 2014/15 clinical trial) plus analysis of cellular morphology. Differentiating itself from the competition both technically and in terms of performance / accuracy, BladderLight™ meets the demands of urologists, pathologists and patients'. Improvements on the accuracy of the 2015 results using over 600 clinical samples, Cytosystems is entering a clinical trial with BladderLight™ Q1 2018.

University of
St Andrews

SLIC (Scattered Light Integrating Collector) is a highly sensitive particle counter; **100-1000 times more sensitive** than the current state-of-the-art. This exquisite sensitivity allows SLIC to detect microbial cells at an unprecedentedly low density in relatively massive volumes of liquid.

The rapidity and sensitivity of the SLIC opens a world of opportunities. It allows for **rapid testing of antibiotic resistance** of bacteria faster than any current device on the market.

SLIC will initially be used for **UTI** and urine pathogen detection in the POC sphere but we will soon be expanding to **blood, CSF** and **wound swab** analysis. The system is rapid, easy to use and extremely inexpensive.

Point Of Care Testing Ltd

Unit 18, Arbroath Business Centre
Dens Road, Arbroath, Angus, DD11 1RS
